Process to install RASWin RTE Manually

Method 1 (for RASWin client computers to re-install current RTE)

Prerequisites: RASWin installed on your computer, this methods install the RTE provided when RASWin was installed for the first time so if you want to make sure you install the latest RTE please use **Method 2**.

Browse to the location where RASWin is installed, usually:

C:\Program Files (x86)\SolidSafe\RASWin v**X.X.X**\RTE

Where X.X.X is the version of RASWin, there the user will see the following files:

EMSURLUpdater.exe	06/03/2017 16:59	Aplicación	35 KB
haspdinst.exe	11/10/2018 11:50	Aplicación	20.596 KB
RASWinHasp.exe	11/10/2018 11:52	Aplicación	15.593 KB
update_vendor.bat	08/09/2016 15:31	Archivo por lotes ...	1 KB

Execute the file marked in yellow **update_vendor.bat**, wait until you get a successful installation message.

The RTE is now installed.

If you don't get a success message you'll have to run the installer manually opening a system console with Admin rights and invoking the command **haspdinst.exe -i -v**

- Method 2 (for RASWin servers computers or to upgrade to latest RTE on clients)

Prerequisites: None.

Download latest RTE from here if you don't have it yet:

http://www.raswin.eu/raswinupdates/VendorRTE.zip

Unzip the downloaded file into a folder of your choice and navigate to it. The following files will be shown there.

EMSURLUpdater.exe	06/03/2017 16:59	Aplicación	35 KB
haspdinst.exe	11/10/2018 11:50	Aplicación	20.596 KB
RASWinHasp.exe	11/10/2018 11:52	Aplicación	15.593 KB
update_vendor.bat	08/09/2016 15:31	Archivo por lotes ...	1 KB

[SOLIDsafe**]**

Execute the file marked in yellow **update_vendor.bat**, wait until you get a successful installation message.

The RTE is now installed.

If you don't get a success message you'll have to run the installer manually opening a system console with Admin rights and invoking the command **haspdinst.exe -i -v**

To ensure the RTE installation is ok then navigate to folder:

C:\Program Files (x86)\Common Files\Aladdin Shared\HASP

You must see there the file **haspvlib_24790.dll**, if not then something blocked the RTE installation (Antivirus Software or AntiMalware Applications could be the issue here, so disable them and try again) if the problem still persist please contact your dealer and notify that the vendor libs failed to install , ask for **Technical Note 021**.
