Ports and Domains Used By RASWin

RASWin uses several domains and ports to update itself and its databases, in order to be able to use this features IT administrators must ensure this ports and domains are not blocked.

DOMAIN	Port
raswin-eu.espacioseguro.com	21
http://www.raswin.eu/raswinupdates	8080

Remember also UDM databases use pictures from URLs, if this pictures are not displayed this could also be caused by the corporate firewall blocking the URL of the pictures, in that case we could not provide a list of these URL as it will depend on the database being used.
